

# **Development of a Requirement Specification for CDIO Workspaces**

GEOFF CUNNINGHAM, PAUL HERMON, CHARLES McCARTAN

MATT MURPHY, CRAIG PUTNAM

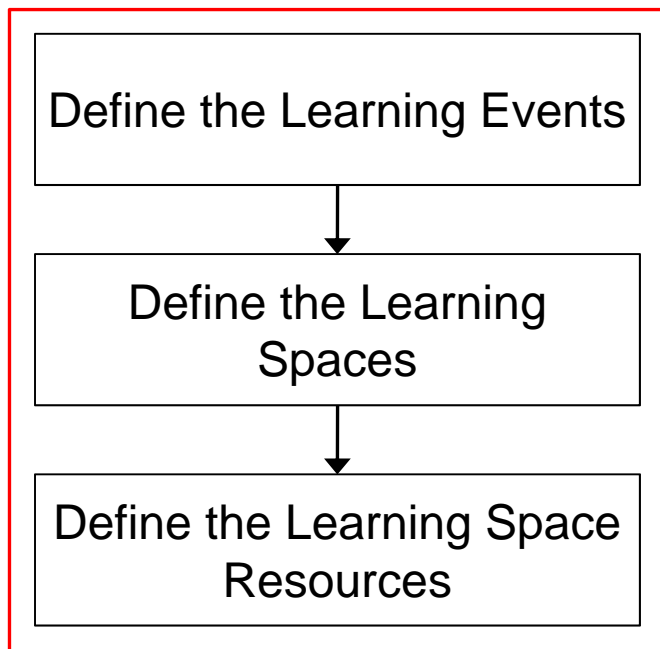

“A learning space should be able to motivate learners and promote learning as an activity, support collaborative as well as formal practice, provide a personalised and inclusive environment, and be flexible in the face of changing needs”

Designing Spaces for Effective Learning

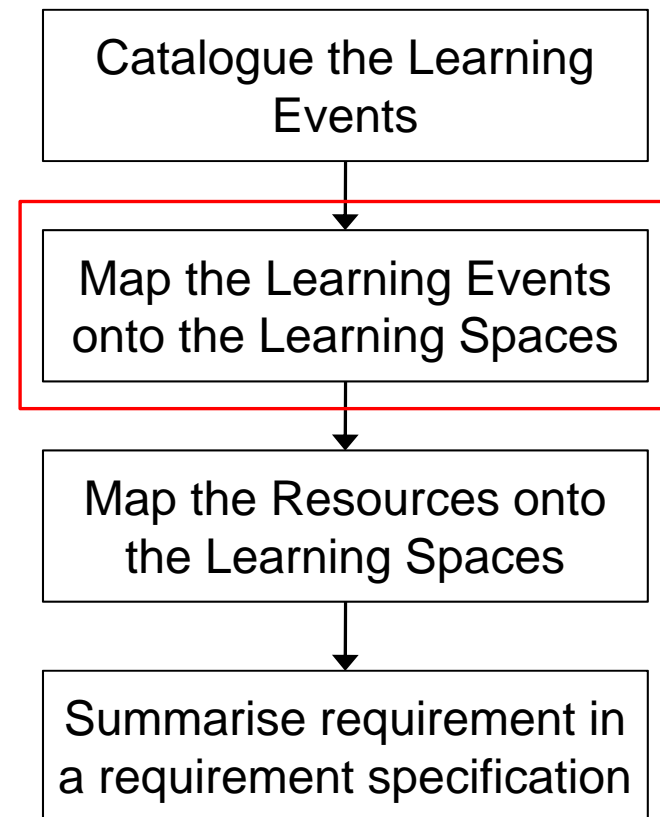

A guide to 21<sup>st</sup> century learning space design

## Establishing the Framework

## Developing the Design Brief

## **Learning Event:**

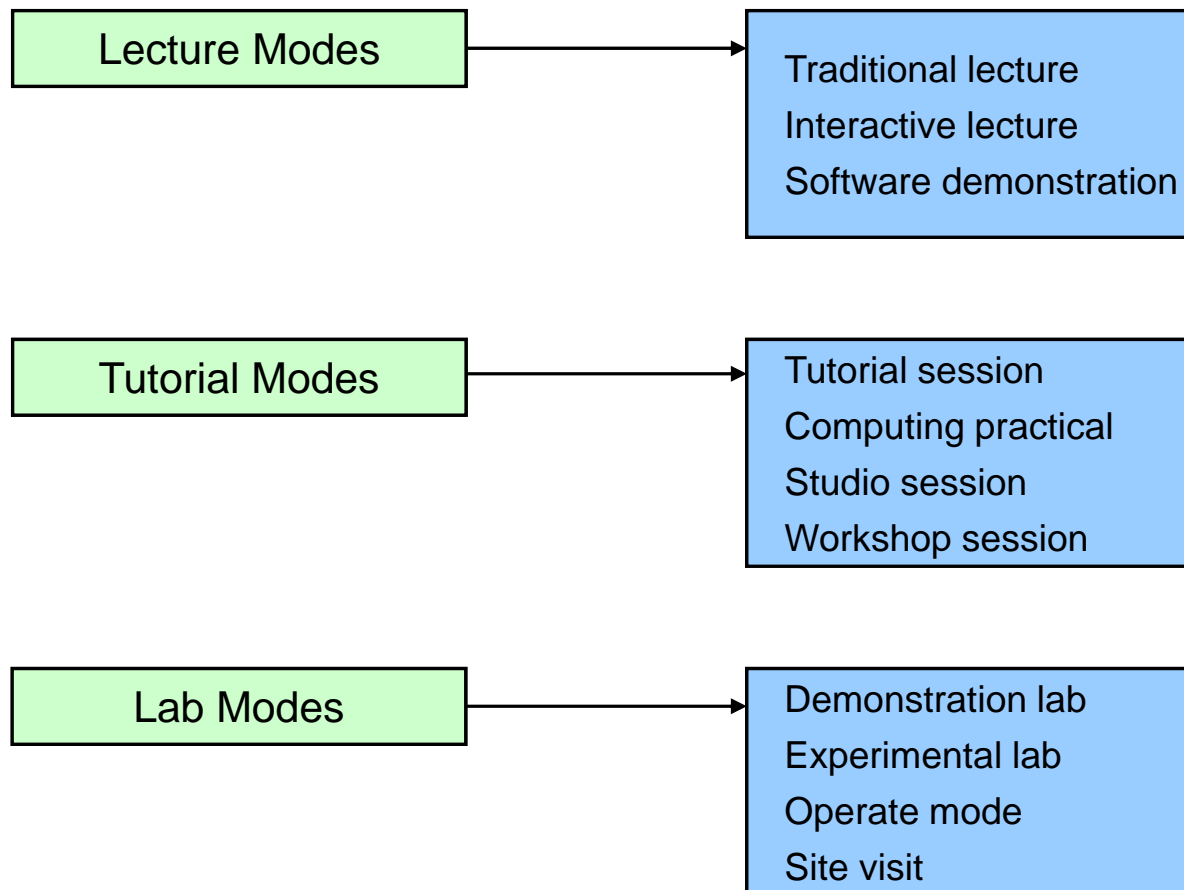

An opportunity, facilitated by the institution, in which the student can develop their professional competence

## **Active Interlude**

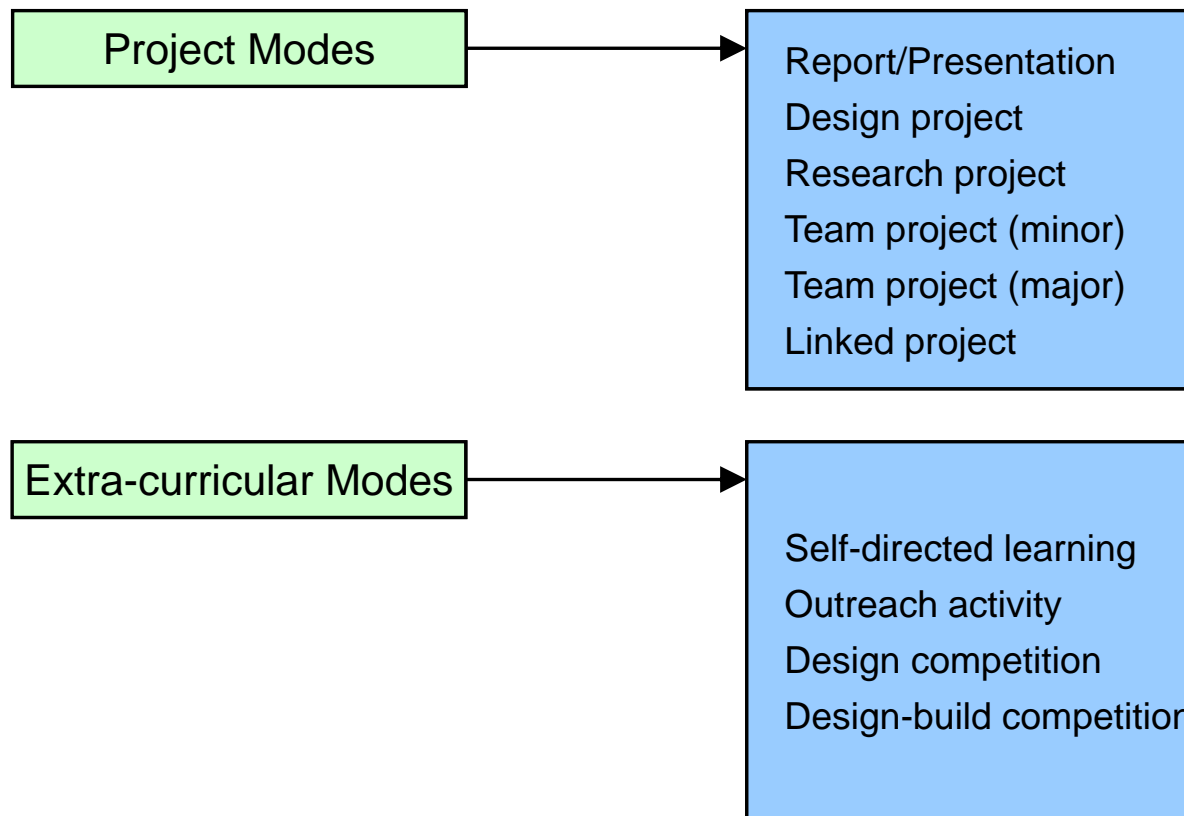

List the categories of learning events that your institution facilitates for student learning.

Example: Lecture

# Conclusions

- Learning spaces are an important element in facilitating active, interactive and experiential learning
- The development of a requirement specification is the same for renovation and new-build
- The requirement specification will require input from faculty to ensure it is an accurate reflection of the needs
- The requirement specification should be constructed without regard for any potential constraints (at least initially)
